Meet the Team!

Reagan Leonard

Reagan is a senior Computer Science major from Spartanburg, SC. He has experience programming in C, C++, Java, SQL, HTML, CSS, and Javascript. Reagan has also worked 3 internship rotations with BMW Manufacturing Co. as a front-end developer and "BI Visualization Engineer". During his time at BMW totaling one year, he developed internal websites that interacted with SAP data systems as well as numerous BI dashboards in visualization tools such as Power BI, Tableau, and Qlik. He is the team leader and will be the one formally coordinating all future meetings and communications with AWS.

Brayden Fidler

Brayden is a senior studying Computer Science from Sumter, SC. His prior experiences include his time as a Process Applications Intern at Savannah River Remediation, a Software Development Co-Op at Thomson Reuters, and a Network Business Intelligence Intern at Windstream. Brayden has a variety of technical skills, but his strengths lie in building automations, analyzing data, and developing on the backend. Outside of the workplace, Brayden is an experienced runner who has been racing competitively for the last 10 years!

Evan Moxley

Evan is a senior Computer Science student also from Sumter, SC. He has previous industry experience working for Dominion Energy as a Software Engineer Intern building and upgrading internal applications. He also worked for a startup company, Navattic, where he worked with full-stack web development. His main languages and technologies include Java, C, C++, Javascript, React, React Native, SQL. Evan is eager to learn and explore new technologies and is always up for a challenge!

Josh Norman

Josh is a senior computer science student graduating in the spring of 2021. He currently resides in the mountains of Asheville, NC. His previous work experience includes mobile development at Benefitfocus. He also worked as a digital fabrication intern focusing on CNC Milling and Mixed Reality. His most recent personal project is SprintPace -- a watch app to help athletes challenge themselves during Covid-19. He is uniquely qualified in different levels of full-stack development and passionate to learn more.

Andy Hsu

Andy is finishing up his last semester for a B.S in Computer Science. He immigrated to the United States at an early age and grew up in Florence, SC. He has over four years of technical internship experience through stints at ACS Technologies, Integrated Systems, and the Watt Innovation Center. His skills include C, C++, Java, GO, SQL, HTML, and Python. His interests lie in data analysis and backend development.
